

memorandum

date March 11, 2010

to Chehalis River Basin Flood Authority

from ESA Adolfson

subject Memo from the City of Chehalis

Item #3 on the March 18 work session agenda and item #11 on the business meeting agenda relate to the tabled discussion on a memo from the City of Chehalis (attached) originally presented to the Flood Authority at the December 17, 2009 meeting.

The memo from the City of Chehalis requested that the Twin Cities project include elements that address the following:

- Primary and secondary access to Centralia Providence hospital;
- China Creek flood control;
- Levee location and maintenance responsibility;
- Flood control/levee protection at Chehalis-Centralia Airport property;
- Dillenbaugh Creek improvements;
- Coal Creek improvements;
- Kresky Avenue improvements; and
- Upstream mitigation of the Chehalis River.

At the December 17, 2009 meeting, a motion was made to support consideration of the projects listed above as part of the Twin Cities project. The motion was tabled until the February 18, 2010 meeting, when it was again tabled. The Flood Authority requested that the topic be put on the March 18, 2010 work session agenda for discussion. It is also on the business meeting agenda as an action item.
